

Life-Changing Care at Home

The Challenge

Patients who are homebound or who have complex medical needs cannot access the care they need, and the statistics are staggering:

7 million homebound or home-limited live in the U.S. and would benefit from home-based primary care

85% cannot access it

12,000 full-time providers are required to meet the current need, a 75% increase from where we are today

10,000 baby boomers are turning 65 every day in the U.S., the number of people 85+ is expected to quadruple by 2050

“Home-based primary care makes the patient feel special and the patient and caregiver more comfortable. It’s so much easier to have the provider come to you.”

– Long-time caregiver for a homebound patient
Member, HCCI Advisory Board

The Solution

Home-Based Primary Care – The “Modern-Day House Call”

The **Home Centered Care Institute (HCCI)** was created to increase access to home-based primary care (HBPC). What is HBPC? It’s when a physician, nurse practitioner, or physician assistant provides primary care services (e.g., annual wellness visits, blood draws, medication management, immunizations, cognitive assessment) in the patient’s home or place they call “home.” Without access to house calls, many are forced to rely on their emergency departments or isolating and expensive hospital or nursing home stays.

HCCI’s Mission

HCCI’s Vision

All those in need of house calls get them.
Because the future of healthcare... is in the home.

HCCI is creating that future
By integrating HBPC into the healthcare system
And your support fuels that change

“HCCI helped me improve the overall quality of care my practice provides.”

– Christine Gardella, MMS, PA-C,
Founder/Owner of Medicine at Home

HCCI’s Program Model

EDUCATION | CONSULTING | RESEARCH | ADVOCACY

The four pillars of our work improve patient health and quality of life, strengthen healthcare practices, reduce Medicare and Medicaid costs, and address deep disparities in access to care across our communities and society.

The Impact

HCCI has trained
over **3,000**
home-based care
professionals and
750 practices

HCCI core partners
grow their practices
by **25%**
on average to
serve more patients

Timely expansion of
HBPC could result in over
\$37.5
billion in savings
in the next 10 years*

Since HCCI's inception,
total house calls
increased **38%**
in traditional Medicare and
over **200%**
in Medicare Advantage

Since 2014, nearly
100,000
more patients in traditional
Medicare received
HBPC services

*“Sometimes just walking
into a room with a smile
on your face can make
all the difference in a
patient’s day”*

– Samantha Hyche, MSN, FNP CEO
SAJ Family Practice Health and
Wellness,
“Chicago Sun-Times”
